Dependencies

All the dependencies can be located from the link below

https://confluence.atlas.philips.com/display/CPA/Creation+of+Release+17.1+-+current+status

Printed copies are uncontrolled unless authenticated

3 Functionality Delivered

3.1 New features

Reference App Releases for PI 17.1 are:

1) F1326-The code base (App framework separation from base app code) in a manner which is easily extendable by the users so that I can onboard more proposition to consume the base app/Reference app code
2) F1403 -Flow Manager Improvements(Threading logic, Error Handling, Unit-Test Coverage)
3) F1456- Integrate CommLib and Enable discovery of reference devices.
4) F1746- Improve Code Coverage and TICS score
5) F497 - Localisation of Reference App application strings.
6) F1623 - Code archive migration to TFS-GIT
7) F1591 - Update Reference App to integrate with latest CoCo builds
8) F1499 - Support propositions (Power sleep, Vita Skin) Organise

3.2 Backwards Compatibility

This release is not fully backward compatabile with the previous version as we have removed flow manager from reference app . Flowmanager is now a part of uAppFramework . On taking this update there might be some duplicate classes for flow manager and some minor api changes

3.3 Features not covered

Features committed are delivered

3.4 Defects Solved

DE13881 [ANDROID - N] Philips LOGO inside Hamburger getting overlapped with the selection items in Hamburger menu

DE13884 [ANDROID - N] Splash screen Philips LOGO and Mobile Apps text is getting overlapped in multiwindow mode

3.5 Residual Anomalies

DE12961 Hamburger list highlighting issue in the below usecase

4 Test Report / Verification of the delivery

Test Report	**Document ID**
Test doc	http://tfsemea1.ta.philips.com:8080/tfs/TPC_Region24/CDP2/TEAM Galileo/_testManagement?planId=558&suiteId=5964&_a=tests

Printed copies are uncontrolled unless authenticated
