FOR CODE

Product : UIKIT

Release Version : 3.0.1

Release Date: 02-05-2016

Integration document: Refer [BasicSetUp.docx](#)

Customer Version ID (Optional): NA

Artifactory Link : url

'<http://maartens-mini.ddns.htc.nl.philips.com:8081/artifactory/libs-release-local-android>'

Release Description:

Android UIKIT is a horizontal library project developed both on Android and IOS platform. It offers common functionalities related to UI components and themes which can be used in all Philips applications.

Version number of this release is 3.0.1

Source code Links:

Branch: master

Source/Binary Files Description:

Not applicable

System Requirements / Configuration: Android:

Min sdk version is "14".

Version -3.0.1

1. Password EditText is added , which can be used to show and hide password .

For Input TextFeilds , `inputText:uikit_password_edit_field="true"`

Set the above attribute to the editText

2. Added the following new fonts

Can be used as `fontPath="fonts/centralesansxthin.ttf"`

`centralesansxthin`
`centralesansxthinitalic`
`centralesansbookitalic`
`centralesanshairline`
`centralesanshairlineitalic`
`centralesanslightitalic`
`centralesansmediumitalic`
`centralesansthin`
`centralesansthinitalic`
`centralesansxbold`
`centralesansxbolditalic`
`centralesansxlight`
`centralesansxlightitalic`

3. Popoveralert : hideProgress() api is added , incase user does not wants to show the progress bar in notification .
4. Changed font padding of all TextViews to true , as some fonts were getting truncated on the top,
5. Uikit latest version number can be shown in vertical app by displaying string "uikit_release_version".

6. Right to left support has been added for all the UIKIT components.
7. [EHUFA- 683] Uikit Modal Alert Crash in some devices . To solve following changes made :
 - 1.Build tools to version "23.0.3"
 2. gradle version to "2.1.0-beta3."
 - 3.Changed the gradle-wrapper.properties file with
"distributionUrl=https\://services.gradle.org/distributions/gradle-2.10-all.zip"
8. Uikit uses VectorDrawable.java and PathParser.java from AOSP version: 5.0.0_r2

Known Issues :

RTL not supported when input type is a password, so RTL support is not extended to UIKITPassword EditText .

The issue is raised in Google forum as a bug at the below link.

<https://code.google.com/p/android/issues/detail?can=2&start=0&num=100&q=&colspec=ID%20Status%20Priority%20Owner%20Summary%20Stars%20Reporter%20Opened&groupby=&sort=&id=201471>

Version -3.0.0

1. Attributes do not have prefix UIKIT and name collides with name of attrs in vertical apps, hence these are prefixed with "uikit_ " .
Where ever attr/attr_name is being used, has to be changed with attr/uikit_attr_name.
2. [DE10522] Radio button not showing on some devices.

Version -2.0.2

[DE10386] Attribute " strokeColor , enableColor , checked , textValue " do not have prefix UIKIT and name collides with name of attrs in vertical apps, hence these are prefixed with "uikit_ " .

Version -2.0.1

1. [DE10330] Added api SetErrorMessage(String str) in Inline forms to set custom error message

2. [DE10331] Updated hamburger Menu to support Philips logo as footer below 4.1 devices

```
updateSmartFooter(View v) is changed to updateSmartFooter(View  
v,int size);
```

This api needs to be called before setting adapter to list `size is list.size()`

3. [DE10332]Fixed Radio Button issue for Note 4 devices

Version - 2.0.0

Date:12-02-2016

Feature completed

Action bar / Toolbar

Social Icon

Spring Board

Lists

Inline Forms

Springboard Buttons and Springboard Buttons with icon

Progress bar / spinner

Controls

Tab bar

Modal Alert

Pop Overmenu

Cards

Favorites

Picker View

UIKit 2.0 release removes ThemeUtils class.

If your app using this class for set theme, Refer BasicSetUp.docx (set theme)

Please refer JavaDoc.zip for Documentation.

(Unzip JavaDoc.zip ,open index.html search MainActivity then search for required components)

Please refer below file for Theming

Theming in Android PhilipsUIKit.pptx

Please refer below docs for initial setup

BasicSetUp.docx

Version - 1.2.0

Date:28-01-2016

Supporting gradle version 1.5.0

Add below line inside defaultConfig in app build.gradle file

```
defaultConfig {
```

```
    generatedDensities = []
}
```

This will block generating PNG from vector resource.

UIKit support backward compatibility for vector support.

It can be used via programmatically.

Example: -> Drawable d =

```
    com.philips.cdp.uikit.drawable.VectorDrawable.create(context,
    R.drawable.xyz);
```

```
    imageView.setImageDrawable(d);
```

Bugs Fixed

DE9720 : Crash issue fixed for PUI switch.

Version - 1.1.0

Date:18-01-2016

Documentation available in java doc format.

Feature completed

1. Hamburger menu
2. About Screen

New feature under development:

1. Modal alert
2. Inline forms
3. Cards
4. Favorites
5. Picker View
6. Springboard Buttons and Springboard Buttons with icon
7. Progress bar / spinner
8. Controls

Version - 1.0.0

Date:04-12-2015

Git: <http://pww.cljenkins.pic.philips.com:9000/scm/git/hor-philipsuikit-android>

First release of Android UIKit.

Please refer integration document (BasicSetUp.docx in the archive) for using themes and other various UI components.

Completed features:
