UIKit 2.0 release removes ThemeUtils class.
If your app using this class for set theme, Refer BasicSetUp.docx (set theme)

Please refer JavaDoc.zip for Documentation.
(Unzip JavaDoc.zip ,open index.html search MainActivity then search for required components)

Please refer below file for Theming
Theming in Android PhilipsUIKit.pptx

Please refer below docs for initial setup
BasicSetUp.docx

Version - 1.2.0 Date:28-01-2016

Supporting   gradle version 1.5.0

Add below line inside defultConfig in app build.gradle file
defaultConfig {

    generatedDensities = []
}

This will block generating PNG from vector resource.
UIKIT support backward compatibility for vector support.

    It can be used via programmatically.
    Example: -> Drawable d =
    com.philips.cdp.uikit.drawable.VectorDrawable.create(context,
R.drawable.xyz);

    imageView.setImageDrawable(d);
